

Future-proofing your parking solution

PARKING SYSTEMS- **MODERNISATION**

GOALS OF
MODERNISATION:

RESTORE/IMPROVE PERFORMANCE

OPERATIONAL SAFETY

USER SAFETY & COMFORT

COMPLY WITH CURRENT REGULATIONS

FUTURE-PROOF SYSTEM

GUARANTEE SPARE PARTS AVAILABILITY

SECURE THE FUTURE OF **YOUR PARKING SYSTEM**

YOUR PARKING SYSTEM HAS COME OF AGE?

Even the best maintained parking systems have many drawbacks once they come of age: lack of spare parts, non-compliance with modern safety standards and outdated user interfaces can lead to reduced performance. Instead of demolition and replacement, repair, refurbishment and modernisation represent cost- and time effective solutions.

AN ATTRACTIVE ALTERNATIVE: MODERNISATION

We modernise almost every parking system with the latest hard- and software components that ensure the safe and smooth operation of the system in the future. We update the complete system from the cabin design, to the latest in system control and operation – at a fraction of the cost of a new one.

TRANSPARENT BASIS FOR DECISION-MAKING

After reviewing your existing planning and plant documents and on the basis of our on-site survey, we analyse the potential of your plant, assess risks, identify opportunities and draw up a transparent plan to base your decision on.

YOUR MODERNISED PARKING SYSTEM IS LIKE NEW

Your new system is a tailor-made and individually designed upgrade to your existing facility. We bring your system up to the latest in legal standards and user handling and offer options such as ev-charging and parking space rental management.

TAILOR-MADE TO YOUR NEEDS:

MODERNISATION WITH LÖDIGE INDUSTRIES

YOUR PROJECT HERE!

FUTURE-PROOF UPGRADE WITH THE MARKET LEADER

Seamless user experiences
Users will enjoy a smooth and intuitive experience in well-lit cabins. Clear instructions and modern digital touchpoints ensure your users will see tangible benefits from your modernisation effort.

Secure spare parts
Modernisation will restore the rapid and reliable availability of spare parts for your system. This is crucial in any successful maintenance strategy. We plan your modernisation accordingly.

24/7 Support
With remote access to our 24/7 control centre, our trained operators can view the status of your system at any time, support personnel on-site or carry out direct troubleshooting if necessary.

EV-Charging Upgrade
Up to 100% of pallets can be equipped for EV-charging to meet future requirements now. Reduce costs by shuffling cars after charging. Power supply can be tracked for correct invoicing.

MODERNISATION OF YOUR PARKING SYSTEM **MADE EASY**

ZERO-DISRUPTION MODERNISATION REQUIRED?

Talk to our experts to find out how we can support you.

WITH YOU ALL THE WAY

1 ANALYSIS/
PROPOSAL

Our team of experts reviews your existing documentation. Based on this and our subsequent onsite assessment we develop a clear and transparent modernisation proposal as the basis for your decision.

2 MANUFACTURE

We source and manufacture all elements of your project. Our own manufacturing plants utilise renewable energy in manufacturing your equipment in Germany (100% RE) and Romania (60% RE).

3 COMPLETION

We take on the complete project management, installation, and commissioning of the modernisation. Hand-over includes a site acceptance test, certification, documentation for your system as well as personnel training.

4 MAINTENANCE

We offer bespoke maintenance services to guarantee your system operates reliably and at the required performance levels. Lödige experts take full responsibility for the performance and long term condition of your parking system.

SMART & MODERN ACCESS OPTIONS

Offer your users the latest in access entry with our app, QR code access and number plate recognition solutions.

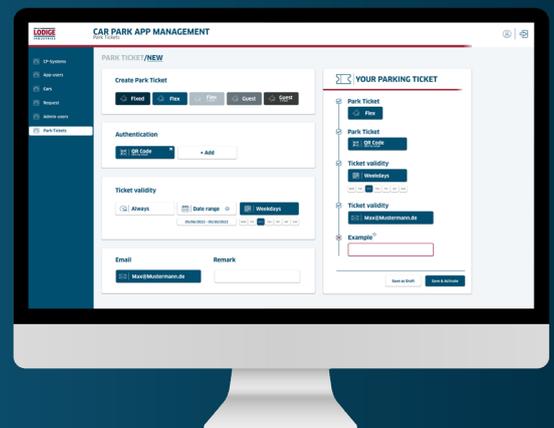

QR CODE

NUMBERPLATE RECOGNITION

APP

CAR PARK MANAGEMENT APP- ParkGO!

Our easy to use parking management app allows easy booking and administration of parking spaces with or without EV-charging. Secure API-integration is available for leading workspace apps such as ParkBee or MyOfficeSpace.
